AUTOMATION

One Accountable Partner for the **Whole Network**

Quick Surf Network is a Dubai-licensed managed service provider. We design, install, secure and operate the infrastructure that sits on top of your internet line – across villas, offices, schools, government accommodations and multi-site enterprises.

We are not an internet provider. Your line, bill and contract stay yours. We engineer and own the managed layer that turns any connection into reliable, secure, wall-to-wall coverage — and we watch it 24/7.

6+

YEARS EXPERIENCE

70+

PROJECTS DELIVERED

2000+

USERS CONNECTED

24/7

MONITORING · 4-HR SLA

"We don't sell internet. We make it work – flawlessly, and around the clock."

What We Do

- Managed WiFi & structured networks
- Security, CCTV & access control
- Smart automation, NAS, PBX & AV
- Network design, heat mapping & custom builds

Why QSN

- One accountable partner — design to 24/7 operation
- Government-proven, enterprise-grade at any scale
- Vendor-neutral, certified engineering
- Aviation-standard documentation & reliability

We Don't Sell Internet. We Make It Work.

01 · YOU ALREADY HAVE

Your Internet Line

Etisalat / e&, du or Starlink — any provider, any plan.
Your line, your bill, your contract stays yours.

02 · WE BUILD & OPERATE

The QSN Managed Layer

Heatmap-designed Wi-Fi, segmented VLANs, CCTV, automation, NAS, PBX and A/V — engineered, secured and monitored 24/7.

03 · YOU GET

Every Device, Always On

Zero dead zones, secure guest & IoT networks, and an engineering team watching it around the clock.

Managed Service Provider — we never resell bandwidth and never lock you to a line.

BEYOND INSTALLATION — WHAT “MANAGED” MEANS

SLA-Backed Response

Urgent faults answered within 4 hours, with windows agreed in writing.

24/7 Proactive Monitoring

We catch and fix issues from our side before you notice them.

Continuous Hardening

Firmware patched, signatures updated, VLANs isolated, IDS/IPS current.

Monthly Health Reports

A clear summary of uptime, capacity and security posture every month.

Remote + On-Site

Most fixes pushed remotely; engineers on the ground across the UAE.

Capacity & Scale Planning

As you add staff, cameras or sites, we tune the network to stay ahead.

Six Core Services

Designed, installed, secured and operated end-to-end – every project hand-engineered, never templated.

Managed WiFi & Networks

Heatmap-designed, zero dead-zone wireless on structured Cat 6A / fibre backbones. Supplied, installed and guaranteed.

Security & CCTV

Remote-view surveillance for home and office, monitored 24/7 — SIRA-aligned installations delivered through approved partners.

Smart Automation

Lighting, access, climate, appliances and security managed from one centralised, IoT-enabled platform.

NAS Data Storage

RAID-protected, snapshot-defended private cloud on hardware you own, with automated 3-2-1 backup.

PBX Voice Systems

One professional number, IVR menus, call queues and mobile extensions on Grandstream, Yealink, UniFi Talk & 3CX.

Audio Visual & Media

Home theatres, distributed audio and conference-room AV — engineered end-to-end on Bose, Dayton & UniFi.

+ Network Design & Implementation

+ WiFi Heat Mapping

+ Custom PC & Workstation Builds

Built for **Your Environment**

The same engineering discipline, tuned to the demands of each sector – from a government fleet to a single villa.

Government & Transport

High-density accommodation Wi-Fi, fleet-grade reliability and SLA-backed uptime at public scale.

RTA DUBAI · 1,220 DRIVER HOMES

Hospitality & Villas

Wall-to-wall guest Wi-Fi, branded captive portals and whole-home automation with zero dead zones.

DEL SOL VALLEY · WI-FI 7 ESTATE

Offices & Enterprise

10 GbE backbones, segmented VLANs, layered firewalls and 24/7 monitored security for the workplace.

BLACK PEARL · 10 GBE OFFICE

Education

Campus-wide, high-density coverage with role-based access, traffic isolation and content control.

EDUCON

Retail & F&B

Reliable POS networks, separated guest Wi-Fi and footfall insight that turns connectivity into revenue.

YOGA LAVIE · MASI · SMBS

Events

Rapid-deploy, scalable Wi-Fi for conferences and activations — engineered to survive peak crowds.

ORBIT EVENTS

Your Network Becomes a Marketing & Insight Channel

Connectivity isn't just access. The managed layer we run on UniFi and Omada turns guest Wi-Fi into a branded touchpoint and a stream of operational insight — opt-in and privacy-aware.

Branded Captive Portals

Custom login pages in your brand — social, email, SMS or voucher sign-in. Opt-in consent captured for future campaigns.

Visitor Analytics

Footfall, dwell time, new-vs-returning, device and demographic mix — the data to plan staffing, layout and promotions.

Engagement & Reach

Redirect to offers on connect, push promotions to opted-in guests, and measure what connectivity returns to the business.

MEET HUR · OUR AI ASSISTANT

Hur — our **Hub for Unified Response** — is QSN's in-house agentic AI, named for the Saker falcon prized for speed, vision and instinct. It runs guided speed tests, triages connectivity issues and hands off to a live engineer in seconds. Embedded across our channels, it makes 24/7 support measurable and always-available.

RTA Dubai's Trusted **Wi-Fi Partner** Since 2021

Quick Surf Network has served the Government of Dubai's Roads & Transport Authority as managed Wi-Fi partner since August 2021 – a continuous relationship operating network solutions for the Authority for over five years. Roughly 1,220 bus-driver accommodations are kept connected daily.

★ OFFICIAL GOVERNMENT RECOGNITION

RTA Letters of Appreciation – 2025 & 2026

QSN holds **two official Letters of Appreciation** from the Roads & Transport Authority, both signed by the **Director of the Buses Department**. The most recent (Ref **RTA/PTA/BUS/4537/2026**, "Best Performance in Providing Internet Services") recognises "**exceptional performance**" across five years of managed Wi-Fi at RTA bus driver accommodations, citing consistent reliability and high quality of service. The earlier letter (Ref **RTA/PTA/BUS/166/2025**) confirmed "satisfactory" performance and an intent to strengthen the partnership with the private sector.

Enterprise discipline applied to government scale — the same standard from a single villa to a national authority.

Featured Deployments

Selected reference projects – full topologies and case studies available on request and at quicksurfnetwork.com/case-studies.

Del Sol Valley – Smart Villa

Fully managed Wi-Fi 7 mesh on Cat 6A backbone

- ✓ 33-camera estate surveillance
- ✓ 10 VLANs · 7 SSIDs · segmented LAN
- ✓ Dual-WAN with Starlink failover
- ✓ KNX building automation
- ✓ UDM Pro Max · 22 access points

Black Pearl – 10 GbE Office

Managed UniFi on 10 GbE end-to-end fibre

- ✓ UDM SE · 7-zone firewall
- ✓ 129 enforced security policies
- ✓ Wi-Fi 7 wireless edge
- ✓ 72,000+ IDS/IPS signatures
- ✓ 8 segmented VLANs · layered VPN

From single-villa Wi-Fi 7 mesh installs to multi-building corporate networks and government accommodations — every project combines enterprise networking, surveillance and automation under one accountable team.

VENDOR-NEUTRAL BY DESIGN

Built On Hardware **We Know Inside Out**

We don't sell a single brand – we engineer with the platform that fits your site and budget. Our engineers are certified across the leading networking, surveillance, automation and AV ecosystems, so every deployment is built to manufacturer standard.

Engineered to an Aviation Standard

QSN is led with the discipline of 26 years of aviation engineering at Emirates. In aviation there is no margin for failure – that culture of documentation, redundancy, preventive maintenance and accountability is applied to every network we design, secure and operate.

Rooted in the UAE

Local knowledge and on-the-ground engineers no global provider can match.

One Accountable Partner

Design, install, secure and operate — a single team owning the outcome.

Support in Our DNA

24/7 monitoring and a 4-hour SLA — support as a written commitment.

Enterprise-Grade, Any Scale

From villas to government — the same engineering discipline throughout.

LEADERSHIP

Kashif Rehman — Founder & CEO

MBA, Coventry University (UK), with 26 years of aviation engineering at Emirates followed by network engineering, structured cabling and IoT integration. Directly involved in every flagship deployment, from quotation to commissioning.

Book a Site Survey

Tell us about your site – villa, office, campus or fleet. We'll heat-map the coverage, scope the build, and put the numbers in writing. No bandwidth resold, no lock-in, no sales quota.

Heatmap surveys are chargeable: AED 250 per indoor floor, AED 350-550 for outdoor areas, AED 200-350 for a call-out visit. The fee is waived in full once the quotation is confirmed and the advance payment is received. Accurate access-point counts and design follow floor-plan submission and the on-site survey.
