Executive Summary

Quick Surf Network LLC (QSN) is a Dubai-licensed managed service provider delivering the design, installation, security and 24/7 operation of business-critical networks across the United Arab Emirates. We are **not an internet provider** — we engineer and own the managed layer that turns any connection into reliable, secure, wall-to-wall coverage for villas, offices, schools, government accommodations and multi-site enterprises.

Established in 2020 and a managed Wi-Fi partner to the **Government of Dubai's Roads & Transport Authority (RTA)** for over five years, QSN combines enterprise-grade engineering with the discipline of a **26-year aviation engineering** background — applied to every project, at any scale.

What We Do

- Managed WiFi & structured networks
- Security, CCTV & access control
- Smart automation, NAS, PBX & AV
- Network design, heat mapping & custom builds

Why QSN

- One accountable partner — design to 24/7 operation
- Government-proven, enterprise-grade at any scale
- Vendor-neutral, certified engineering
- Aviation-standard documentation & reliability

"We don't sell internet. We make it work – flawlessly, and around the clock."

WHO WE ARE

Built for the Digital Age

Quick Surf Network LLC (QSN) is a Dubai-based managed service provider, established 17 September 2020 as businesses moved into the era of remote management and always-on connectivity. We design, install, secure and operate the infrastructure that sits on top of your internet line.

We are **not an ISP** — we make the connection you already have work flawlessly across villas, offices, schools and multi-site enterprises throughout the UAE. Our roots run deep here, and that local knowledge gives us an edge no global provider can match.

MONITORING & SUPPORT

WHAT DRIVES US

Speed

Fast, responsive networks deployed with precision and guaranteed performance.

Security

Homes and businesses protected 24/7 with remote-enabled monitoring.

Service

Customer service at our core — support that keeps you connected without interruption.

Connectivity

Seamless infrastructure keeping every device and person always online.

Innovation

IoT-enabled automation and agentic AI support — our in-house Hur agent — delivered today.

UAE Roots

Deeply rooted in the UAE — local expertise, global engineering standards.

"Customer service is at the core of our DNA – 24/7 support to keep every network at peak signal and speed."

We Don't Sell Internet. We Make It Work.

01 · YOU ALREADY HAVE

Your Internet Line

Etisalat / e&, du or Starlink
— any provider, any plan.
Your line, your bill, your contract stays yours.

02 · WE BUILD & OPERATE

The QSN Managed Layer

Heatmap-designed Wi-Fi, segmented VLANs, CCTV, automation, NAS, PBX and A/V — engineered, secured and monitored 24/7.

03 · YOU GET

Every Device, Always On

Zero dead zones, secure guest & IoT networks, and an engineering team watching it around the clock.

Managed Service Provider — we never resell bandwidth and never lock you to a line. You keep your connection; we own the infrastructure, security and uptime on top of it.

BEYOND INSTALLATION

What “Managed” Actually Means

SLA-Backed Response

Urgent faults answered within 4 hours, with windows agreed in writing.

24/7 Proactive Monitoring

We catch and fix issues from our side before you notice them.

Continuous Hardening

Firmware patched, signatures updated, VLANs isolated, IDS/IPS current.

Monthly Health Reports

A clear summary of uptime, capacity and security posture every month.

Remote + On-Site

Most fixes pushed remotely; engineers on the ground across the UAE.

Capacity & Scale Planning

As you add staff, cameras or sites, we tune the network to stay ahead.

Six Core Services

Designed, installed, secured and operated end-to-end – every project hand-engineered, never templated.

Managed WiFi & Networks

Heatmap-designed, zero dead-zone wireless on structured Cat 6A / fibre backbones. Supplied, installed and guaranteed.

Security & CCTV

Remote-view surveillance for home and office, monitored 24/7 — SIRA-aligned installations delivered through approved partners.

Smart Automation

Lighting, access, climate, appliances and security managed from one centralised, IoT-enabled platform.

NAS Data Storage

RAID-protected, snapshot-defended private cloud on hardware you own, with automated 3-2-1 backup.

PBX Voice Systems

One professional number, IVR menus, call queues and mobile extensions on Grandstream, Yealink, UniFi Talk & 3CX.

Audio Visual & Media

Home theatres, distributed audio and conference-room AV — engineered end-to-end on Bose, Dayton & UniFi.

Built for **Your Environment**

The same engineering discipline, tuned to the demands of each sector – from a government fleet to a single villa.

Government & Transport

High-density accommodation Wi-Fi, fleet-grade reliability and SLA-backed uptime at public scale.

RTA DUBAI • 1,220 DRIVER HOMES

Hospitality & Villas

Wall-to-wall guest Wi-Fi, branded captive portals and whole-home automation with zero dead zones.

DEL SOL VALLEY • WI-FI 7 ESTATE

Offices & Enterprise

10 GbE backbones, segmented VLANs, layered firewalls and 24/7 monitored security for the workplace.

BLACK PEARL • 10 GBE OFFICE

Education

Campus-wide, high-density coverage with role-based access, traffic isolation and content control.

EDUCON

Retail & F&B

Reliable POS networks, separated guest Wi-Fi and footfall insight that turns connectivity into revenue.

YOGA LAVIE • MASI • SMBS

Events

Rapid-deploy, scalable Wi-Fi for conferences and activations — engineered to survive peak crowds.

ORBIT EVENTS

Specialist Capabilities

Network Design & Implementation

End-to-end architecture — topology, VLAN segmentation, switching, routing and security design, then full on-site implementation and commissioning.

WiFi Heat Mapping

Predictive and on-site RF surveys mapping coverage, capacity and interference before a single access point is mounted — so the design is right the first time. Surveys are chargeable: AED 250 per indoor floor, AED 350–550 outdoor; the fee is waived in full once the quotation is confirmed and the advance payment is received.

Custom PC & Workstation Builds

Purpose-built workstations specified, assembled and configured to the exact performance and budget profile each client needs.

MEET HUR · OUR AI ASSISTANT

An AI Wi-Fi Diagnostic Agent, Built In-House

Hur — our **Hub for Unified Response** — is QSN's proprietary agentic AI, named for the Saker falcon prized for speed, vision and the instinct to act the instant something moves. It helps clients run guided speed tests, triage connectivity issues, and reach a live engineer in seconds. Deployed as an installable web app for field staff and embedded across our digital channels, Hur turns 24/7 support into a measurable, always-available service.

Guided Diagnostics

Instant Engineer Handoff

Installable Web App

Your Network Becomes a Marketing & Insight Channel

Connectivity isn't just access. The managed layer we run on UniFi and Omada turns guest Wi-Fi into a branded touchpoint and a stream of operational insight – opt-in and privacy-aware.

Branded Captive Portals

Custom login pages in your brand — social, email, SMS or voucher sign-in. Opt-in marketing consent captured for future campaigns.

Visitor Analytics

Footfall, dwell time, new-vs-returning, device and demographic mix — the data to plan staffing, layout and promotions.

Engagement & Reach

Redirect to offers on connect, push promotions to opted-in guests, and measure exactly what your connectivity returns to the business.

Reported, not guessed. Captive-portal and analytics insight is folded into your monthly QSN health report alongside uptime and security posture — so guest Wi-Fi becomes a measurable business asset, not just a utility.

VENDOR-NEUTRAL BY DESIGN

Built On Hardware **We Know Inside Out**

We don't sell a single brand – we engineer with the platform that fits your site and budget. Our engineers are trained and certified across the leading networking, surveillance, automation and AV ecosystems, so every deployment is built to manufacturer standard.

✓ SIRA-ALIGNED CCTV DEPLOYMENTS

✓ CERTIFIED, VENDOR-NEUTRAL ENGINEERING

Certified, vendor-neutral engineering — the right tool for each environment, never a sales quota.

RTA Dubai's Trusted **Wi-Fi Partner** Since 2021

Quick Surf Network has served the **Government of Dubai's Roads & Transport Authority (RTA)** as managed Wi-Fi partner since **August 2021** — a continuous service relationship delivering and operating network solutions for the Authority for **over five years and counting**. Approximately **1,220 bus-driver accommodations** are kept connected daily across RTA sites.

TECHNICAL SUPPORT

★ OFFICIAL GOVERNMENT RECOGNITION

RTA Letters of Appreciation — 2025 & 2026

QSN holds **two official Letters of Appreciation** from the Roads & Transport Authority, both signed by the **Director of the Buses Department** — a documented record of sustained performance, not a single commendation.

2026 · REF
RTA/PTA/BUS/4537/2026

Best Performance in Providing Internet Services

Recognises **"exceptional performance"** across five years of managed Wi-Fi at RTA bus driver accommodations, citing consistent reliability and high service quality — and the value of keeping drivers connected to families overseas.

2025 · REF
RTA/PTA/BUS/166/2025

Service Period Commendation

Confirms **"satisfactory"** performance throughout the managed Wi-Fi service period and states an intent to strengthen the partnership with the private sector.

Enterprise discipline applied to government scale — the same engineering standard from a single villa to a national authority.

Featured Deployments

Selected reference projects – full topologies and case studies available on request and at quicksurfnetwork.com/case-studies.

Del Sol Valley – Smart Villa

Fully managed Wi-Fi 7 mesh on Cat 6A backbone

- ✓ 33-camera estate surveillance
- ✓ 10 VLANs · 7 SSIDs · segmented LAN
- ✓ Dual-WAN with Starlink failover
- ✓ KNX building automation
- ✓ UDM Pro Max · 22 access points

Black Pearl – 10 GbE Office

Managed UniFi on 10 GbE end-to-end fibre

- ✓ UDM SE · 7-zone firewall
- ✓ 129 enforced security policies
- ✓ Wi-Fi 7 wireless edge
- ✓ 72,000+ IDS/IPS signatures
- ✓ 8 segmented VLANs · layered VPN

From single-villa Wi-Fi 7 mesh installs to multi-building corporate networks and government accommodations — every project combines enterprise networking, surveillance and automation under one accountable team.

OUR ENGAGEMENT MODEL

WHAT QSN DELIVERS

- Network design, engineering & implementation
- Supply & configuration of all active hardware
- Procure-to-order — equipment sourced per project
- B2B partner to integrators, contractors & enterprises
- SIRA-aligned CCTV via approved partner companies

HANDLED BY SPECIALISTS / CLIENT

- Cable pulling & labour-intensive work via vetted subcontractors under QSN supervision
- Building electrical works — by a licensed contractor
- Masonry & civil works — by a licensed contractor or the client's own team

Engineered to an Aviation Standard

QSN is led with the discipline of **26 years of aviation engineering at Emirates (EK)** — the UAE's pride and flagship carrier, and a global benchmark for safety, reliability and uncompromising standards. In aviation there is no acceptable margin for failure; that same culture of documentation, redundancy, preventive maintenance and accountability is applied to every network QSN designs, secures and operates. Work that leaves a lasting impression of quality.

Rooted in the UAE

Local knowledge and on-the-ground engineers no global provider can match.

One Accountable Partner

Design, install, secure and operate — a single team owning the outcome.

Support in Our DNA

24/7 monitoring and a 4-hour SLA — support as a written commitment.

Enterprise-Grade, Any Scale

From villas to government — the same engineering discipline throughout.

LEADERSHIP

Kashif Rehman — Founder & CEO

MBA, Coventry University (UK), with 26 years of aviation engineering at Emirates followed by network engineering, structured cabling and IoT integration. Direct involvement in every flagship deployment ensures QSN's standards are upheld from quotation to commissioning.
